Experience: **VFT Solutions, Inc** (Toronto, Canada) Apr 17 – Jul 20
Full-Stack Developer

- Architect and lead development of cutting-edge software for the company. The new software (Hydra) reduced associated costs by 75% and was up to 400% faster/more efficient.
- Implement gentle transition from legacy software, to new software. Users reported an easy learning curve and a far superior UX.
- Provide Long Term Support for legacy software while leading development of an entirely new product on a tight deadline.

Presearch.org, (Ontario, Canada) Jun 17 – Jun 18
Product Owner / Developer – Startup Contractor

- Lead multiple contractors to create an innovative search monetization method that hooked into the Ethereum blockchain.
- Consult with CEO on potential tracks for the product (Keyword staking, avoiding subscription & pay2search models, user acquisition).
- Direct User Experience to further increase user retention (adopted Google methodology of speed is king).

Dylan Curran Consultancy and Development Sep 14 – Present
Consultant / Developer

- Work with local businesses to develop a digital experience for their companies, including full-stack development, design, and deployment.
- Consult for large organizations on technical ethics and direction (ACLU, DuckDuckGo).
- Contributed technical articles on a regular basis to multiple outlets, including the Guardian, and keynote speaker at multiple events.
